

## With this tool you can analyze your optimizations report generated by Tradestation and Multicharts

### Note & Setting \*\*\*\*\*

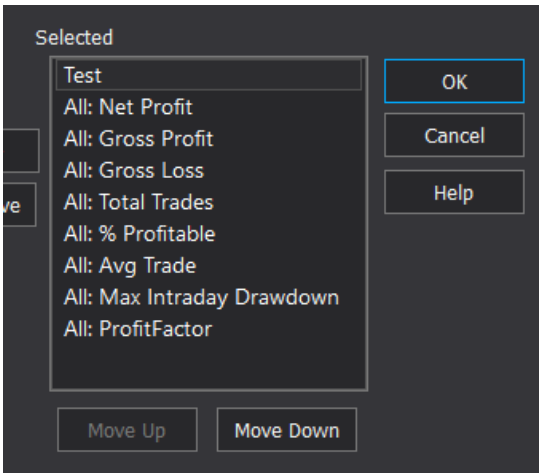

- Optimize only two parameters at a time to make the tool work
- If you open another page in your browser you can compare multiple optimizations report at a time
- You can download the graphic image:

- Remember that the fourth column will be our z axis, so I generally use Net Profit as a comparative stability parameter but you can use any other parameter as long as you change it from settings by moving up / down the parameters you want to compare the surroundings with.

TradeStation Strategy Optimization Report - @ES Daily [CME] E-mini S&P				
Customize Fields				
	_T1: Parameter1	_T2: Parameter2	Test	All: Net Profit
1	10	10	100	85,400.00
2	9	10	99	109,187.50

Just change from settings by moving up / down the parameters with which you want to compare the surroundings:

Final results:

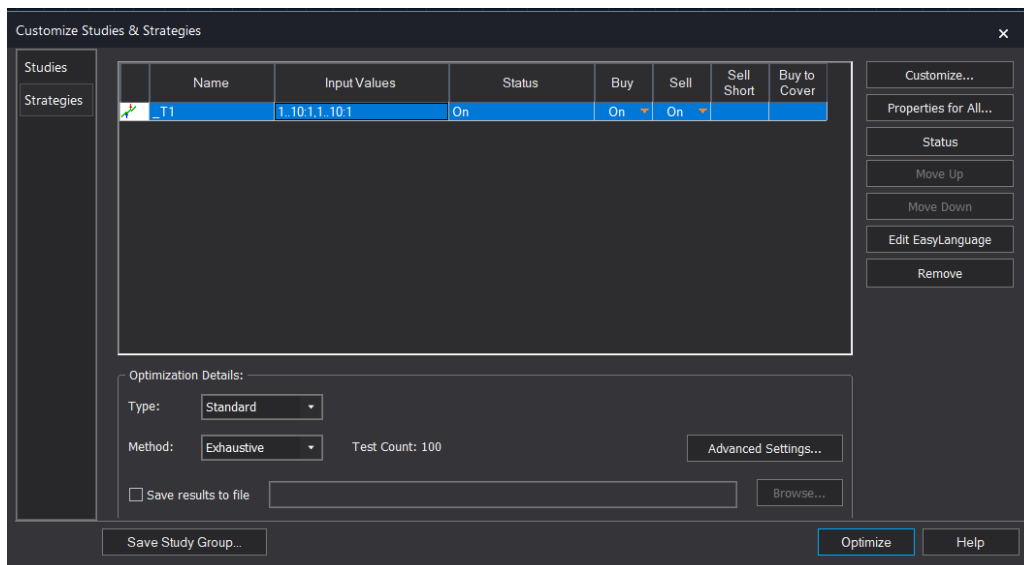

TradeStation Strategy Optimization Report - @ES Daily [CME] E-mini S&P

	_T1: Parameter1	_T1: Parameter2	Test	All: Net Profit
1	10	10	100	85,400.00
2	9	10	99	109,187.50

**GUIDE \*\*\*\*\***

First Step - Optimize parameters:

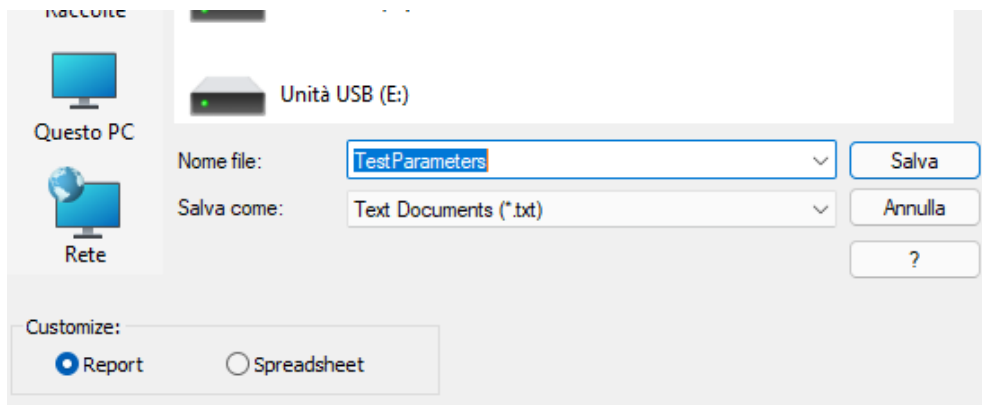

Second Step - Save the optimization results:

TradeStation Strategy Optimization Report - @ES Daily [CME] E-mini S&P 500

Save

	Parameter1	_T1: Parameter2	Test	All: Net Profit
1	10	10	100	85,400.00
2	9	10	99	109,187.50
3	8	10	98	96,387.50

Third Step - Upload the results to <https://stableparameters.com/>

\*\*\*\*\* ENJOI IT!
